

2012 Seattle Wedding Show Height Restrictions Approval Form

Exhibitors with exhibits that exceed 8' in height or want to have a tent or fabric covering their booth must complete and submit this form for approval. After show management approves your display plan, an approved form will be sent to you. The approval form must be posted in your booth until show opening.

Please refer to the show floor plan booth height legend, for the maximum height restriction for your booth location before applying for a variance. http://weddingshow.com/Updated_Items/vendor_documents/FloorPlan.pdf If any part of your booth is approved to exceed the 8' height limit and can be seen from the adjacent aisle way, you will be responsible for back draping with white drapery from the show decorator at your expense. Intent: If a portion of an exhibit booth extends above 8' high, the exhibit booth background may detract from the exhibit directly behind that booth booth.

Side Walls

Exhibitors are entitled to a reasonable sight line from the aisle regardless of the size of the exhibit space. Exhibitors can only block with displays half of their sidewall from back to front. No part of your sidewall can exceed 8' in height. The back of sidewalls and displays must also be astatically pleasing toward neighboring booths.

No exhibit or product can protrude into the aisle ways.
